

Dear all,

Thank you for registering for the above-mentioned Webinar. We are really excited to have the opportunity to learn from the experts, Ingrid Klingmann and Heinrich Klech on how IFAPP and PharmaTrain developed the standards and how course providers educating in the scientific discipline of pharmaceutical medicine can achieve PharmaTrain recognition.

Safe and efficient development of new medicines requires comprehensive knowledge of the full Research & Development process including regulatory and ethical requirements from bench to bedside. Course providers educating students in pharmaceutical medicine/medicines development science need to ensure reliable quality in the scope of content and efficiency of teaching according to global standards. For students and employers it is important that the achieved academic degree has been provided by a globally recognised course provider.

DATE: September 27, 2022 at 2:00 – 3:30 pm CET
